Importing orders by CSV file .....	11
Returning articles .....	11

## To start with

In 2015 Motolux moved to a new platform. This manual is intended to give our clients a quick walkthrough on how to use the online ordering system. New functionality will be added continuously and therefore this manual will be updated accordingly.

## Changes

The new online ordering system is easier to use and more flexible than the old one. There is however some loss of functionality which is just temporary:

1. There is no quick entry screen

This functionality will not return as importing a CSV file is possible and just as quick. Check the chapter about importing CSV files with your order to learn how to.

## New customers

If you are not a customer yet, you can send your company details to [info@motolux.com](mailto:info@motolux.com) where a Sales Rep will check them and perform an intake by telephone. When an account is made in our system, you will have access to our online ordering system by using the email address you provided us with. From there on you can follow this manual as an existing customer.

## Existing Customers

Existing customers have already an account in our system and therefore access to the online ordering system. Contrary to our previous system the user name is NOT your client number anymore but the email address you provided. If you are unsure which email address is on file, please contact our Sales Reps to check.

To gain access, you can click the login option at the home screen as shown in the picture below.

On the home screen you will find the product categories that allow you to browse through our ranges. When not logged on you will see Suggested Retail Prices only.

HOME SHOP ALL HANDLEBAR FOOTPEGS EXHAUST ENGINE BODYWORK ELECTRICAL SADDLE LUGGAGE

### Sign In

#### Reset Password

Enter your email below and we'll send you a link to reset your password.

Email Address (required):

[Sign In Now >](#)

Fill in your email address and press “Send Email”. Within a few minutes you will receive an email with instructions on the specified email address. You can use this method any time you have forgotten your password.

When you have your user name (email address) and password you can use the login page as a returning customer by filling in your email address and password. Press "Sign in" to gain access.

After being logged in, you will find a menu option top right to change your personal settings and view your order history as well as past invoices. Feel free to explore these options.

By pressing “Your Account” instead of choosing the underlying menu options, you will be directed to an overview page. Please take a moment to check this as it will make ordering items easier if all required info is correctly entered into our systems.

## Finding and ordering items

The search bar top right provides you easy access to known items. You can use article numbers as well as parts of descriptions. While typing you will see matching products in a drop down menu.

When using the search box you can either press ENTER on your keyboard or click the magnifying glass to see a list of products matching your criteria.

By clicking the product image you will see a quick view that also allows you to order the product.

By clicking the product link you will be taken to the product overview page where you are able to order it or share it on your social media.

If you wish to order a product, select the desired quantity and press “ADD TO CART”.

A popup will be shown to allow you to checkout immediately or continue shopping.

*TIP: in order to work faster, use the quickview option to add products to your cart.*

## Finalizing your order

When you have all items in your cart that you wish to order, you would like to finalize this in order to have it shipped. If you are unsure whether or not you will need more items, please wait a while to finalize it. Once an order is submitted it is not possible to add items to an existing order.

Finally you can review your order and place it.

## Importing orders by CSV file

It is possible to import large order files instead of adding those manually to your cart. As before we accept a CSV formatted file with the following definition:

*D319999,57-400,4*

*D319999,57-402,1*

In this format there is no header, just the order line information. It starts with your client number which starts with D followed by your country code (99 for distributors) and then a unique part identifying you as a customer. Next is the article number and finally the amount.

Please note that the fields should be comma separated and not semi-colon as used by Excel.

Select the file in the screen below which can be found under account info -> Order Import and press the Import button. After importing your order is available as a sales order and you will see the order number for that. If something went wrong you will receive an email with the errors.

The screenshot shows the Motolux website interface. At the top, there is a navigation bar with the language set to English (U.S.), a welcome message for an anonymous customer, and links to 'Your Account' and a shopping cart containing 1 item. Below the navigation bar is the Motolux logo and a search bar. A red navigation menu contains links for HOME, SHOP ALL, HANDLEBAR, FOOTPEGS, EXHAUST, ENGINE, BODYWORK, ELECTRICAL, SADDLE, and LUGGAGE. The breadcrumb trail shows HOME > MY ACCOUNT > IMPORT ORDER. The 'My Account' section on the left has a sidebar menu with options: Overview, Orders (with a dropdown arrow), Order History, Returns, Receipts, Reorder Items, Quotes, and Order Import (which is circled in green). The 'Import Order' section on the right features a 'Select File:' label, a 'Bestand kiezen' button, the text 'Geen bestand gekozen', and an 'Import' button.

## Returning articles

If you would like to return an article for reason of warranty or refund, please follow our return procedure. First of all, if you are unsure please contact our sales reps first before shipping an item back. Under no circumstances ship an item back without a return number (RT00999 e.g.). This will prevent items showing up unattended in our warehouse.

You can request a return from your order history.
