

SEPHRA[®] Sephra CF54RC Convertible

With our new combination version you can use it in a 4 tiered 54" (137cm), a 5 tiered 44" (112cm) or 3 tiered 34" (86cm) assembly. The fountain can hold up to 10Kg of chocolate, which will serve approx 300 guests. This fountain is perfect for all applications, in particular rental and general event banqueting, hotels or restaurants.

It features a removable bowl which melts the chocolate in the base of the fountain, so there is no need for a separate chocolate melter or microwave. If you have a slightly smaller event, simply remove the extension parts to convert the fountain to a 44" or 34" unit.

Specifications

220/240v - 810W
Upgraded Direct Drive Motor
Dual Fan Motor Cooling
Patent Protected Removable Tier Design
2000 Hour Service Interval

Optional Accessories

Sephra Illuminated Surrounds

Our illuminated surrounds, for example, are made from heavy-duty food grade polypropylene. Unlike cheaper alternatives this material will not crack easily on impact.

As well as this, Polypropylene is welded instead of glued - this gives your illuminated surround more strength and flexibility.

Perhaps most importantly, this is a food grade material unlike the most popular alternative, Perspex. It is simple variations like these that set Sephra products apart from our competitors.

Our surrounds all use a colour changing light emitting diode (LED) system. These can be remote controlled giving you the ability to change colour shade, speed and pattern depending on the event.

Sephra Wind/Sneeze Guards

Our wind/sneeze guards are made from clear acrylic, allowing the same high impact image of curtaining chocolate, whilst providing 360 degrees of protection from wind, airborne contamination and insects. Whether you are looking to keep contaminants (such as dust, insects and fingers) from the chocolate, or to protect against wind during outdoor events, these accessories provide the perfect solution.

All Sephra wind/sneeze guards are fitted with hinges and a clear acrylic removable door; this allows access to use your fountain easily and effectively.
